NEFF Pressen

The Walter NEFF GmbH – the specialist for hydraulic presses – is located in the city of technology named Karlsruhe. The mid-sized enterprise developed since its foundation in 1947 from a handcraft business to a global player with more than 6.000 worldwide delivered presses and around 45 employees at the headquarters in Karlsruhe.

Business Manager Oliver Dörmann gives top priority to innovations: "**Innovations are an important topic at NEFF company**". Due to this we keep on developing technologies: "An optimized Energy-Management, completely automated lines and the use of the latest materials are topics which we are dealing with already today."

The will to innovate, precision and endurance made **NEFF-Pressen a brand**. Our product range covers the complete spectrum of hydraulic presses, modern forming lines, high efficient production lines up to Turn-key-solutions such as TWIN-press lines in the cold forming range and the latest hot forming technologies.

Those different procedures combined with our high efficient technological solutions are **time and cost saving for our customer** and provide furthermore additionally **a variety of flexible possibilities of application**.

We manufacture presses and lines for the sheet fabricating and plastics processing industry as well for the massive forming.
